CHAPTER 1

Business Strategy Prompts

12 Prompts

Competitive Landscape Scanner

I'm running **[one sentence about your business]**. Act as a market intelligence analyst. Map out my competitive landscape: identify my 3 real competitors (not who I think they are — who customers actually choose instead), their core weakness I can exploit, and the one positioning angle that makes me impossible to compare. Be ruthlessly specific. If you need clarification, ask one pointed question.

WHEN TO USE

Before finalizing your marketing message or when competitor research feels overwhelming.

PRO TIP

The AI often identifies non-obvious competitors (alternatives, not direct clones) — pay attention to those.

Business Model Stress Test

I'm building [one sentence about your business]. You're a skeptical investor who's seen 1,000 pitches. Tell me: the single biggest assumption I'm making that's probably wrong, the one cost I'm underestimating, and whether my business has a "rich person problem" or a "real person problem." Don't sugarcoat it. If something's unclear, ask me one clarifying question.

WHEN TO USE

Before committing serious time or money, or when something feels off but you can't pinpoint it.

PRO TIP

The "rich vs real problem" distinction often reveals if you have product-market fit or just a feature.

Customer Persona Deep Dive

My customer is **[one sentence description]**. Act as a consumer psychologist. Tell me: what they're doing the hour before they need my solution, the exact words they use when complaining about this problem to a friend, and the real reason they haven't solved this yet (not the reason they'll tell me). Be specific enough that I'd recognize them in a coffee shop. Need more context? Ask me one question.

WHEN TO USE

When your marketing feels generic or when you're guessing at customer motivations.

PRO TIP

The "words they use with a friend" insight is gold for landing page copy and ad targeting.

Pricing Strategy Optimizer

I'm selling **[one sentence about your offer]**. Act as a pricing strategist. Give me three specific price points: the "coward's price" (too low), the "goldilocks price" (probably right), and the "bold price" (tests if I'm undervaluing). For each, tell me the exact customer segment it attracts and why. Then tell me which one to start with and why. Be specific with dollar amounts. If you need more info, ask one question.

WHEN TO USE

When launching, when revenue feels stuck, or when you're afraid to charge more.

PRO TIP

Test the "bold price" with your next 10 customers — you'll be surprised how often it works.

SWOT Analysis That Actually Helps

I'm running [one sentence about your business]. Do a SWOT analysis, but make it actually useful: Strengths (pick ONE to double down on), Weaknesses (pick ONE that's actually killing growth), Opportunities (pick ONE I can act on this month), Threats (pick ONE that could end me in 12 months). For each, give me a specific action, not a vague observation. If you need context, ask one question.

WHEN TO USE

Quarterly planning, when you feel scattered, or when "everything matters" and you can't prioritize.

PRO TIP

The ONE weakness is usually what you're avoiding — start there.

Revenue Forecasting Framework

I'm at [current monthly revenue or "pre-revenue"]. My business is [one sentence]. Act as a CFO. Build me a 12-month revenue forecast with three scenarios: pessimistic (if things go badly), realistic (if I execute decently), optimistic (if I nail it). For each month, tell me the key assumption that makes or breaks the forecast. Use actual numbers. If you need more info, ask one question at a time.

WHEN TO USE

Planning runway, pitching investors, or deciding if you can quit your job.

PRO TIP

The pessimistic scenario is your real plan — if you can't stomach it, don't start.

Partnership Evaluation Matrix

I'm considering partnering with **[type of partner or specific company]**. My business is **[one sentence]**. Act as a deal advisor. Score this partnership 0-10 on: strategic fit, revenue potential, operational headache, and brand risk. Then tell me the ONE question I should ask them to know if this is real, the ONE thing I should negotiate hard on, and whether to do this deal. Be direct. Need more context? Ask me one question.

WHEN TO USE

Before saying yes to any partnership, collaboration, or joint venture.

PRO TIP

If the "brand risk" score is above 6, walk away — no amount of revenue is worth it.

MVP Scope Definer

I'm building [one sentence about your product]. Act as a ruthless product manager. Tell me: the ONE core feature that must work perfectly, the 3 features I think I need but should cut, and the "magic moment" when a user goes from skeptical to hooked. Then give me a 4-week build plan with weekly milestones. Be brutally minimal. If you need clarification, ask one question.

WHEN TO USE

Before building anything, when scope is creeping, or when your MVP has 47 features.

PRO TIP

If you can't describe the "magic moment" in one sentence, your MVP isn't focused enough.

Product Positioning Statement Builder

I'm selling **[one sentence about your product]**. Act as a brand strategist. Write me a positioning statement: "For **[specific who]**, who **[specific problem]**, **[my product]** is a **[category]** that **[unique benefit]**. Unlike **[alternative]**, we **[key differentiator]**." Make it so specific that it excludes 80% of people — that's the point. Then tell me the one tagline to test. Need more info? Ask one question.

WHEN TO USE

When your messaging feels generic, before a website rewrite, or when nobody understands what you do.

PRO TIP

If your positioning could apply to 3+ competitors, it's too broad — start over.

Market Entry Risk Assessment

I'm entering [market/industry] with [one sentence about my business]. Act as a risk analyst. Identify: the regulatory landmine I'm probably ignoring, the incumbent who will crush me if I get on their radar, the customer expectation I can't afford to meet, and the one "unfair advantage" I need to survive. Be specific and scary. If something's unclear, ask me one targeted question.

WHEN TO USE

Before entering a new market, pivoting, or expanding to a new customer segment.

PRO TIP

The "unfair advantage" requirement is your filter — if you don't have one, pick a different market.

Customer Retention Strategy

I'm running [one sentence about your business]. My customers [describe churn situation or "are new"]. Act as a retention expert. Tell me: the exact moment when customers mentally check out (be specific — "day 3" not "early on"), the ONE feature or touchpoint that would make them stay, and a 30-day re-engagement plan for at-risk customers. Give me specific tactics, not theory. Need more context? Ask one question.

WHEN TO USE

When churn feels high, when growth is masking retention problems, or before investing in acquisition.

PRO TIP

Retention improvements compound — a 5% boost beats a 20% acquisition increase over 12 months.

Investor Pitch Deck Outliner

I'm raising [amount or "pre-seed"] for [one sentence about my business]. Act as a pitch coach who's helped 100+ founders raise. Outline my 10-slide deck: tell me the exact story arc, the ONE slide that will make or break the pitch, the objection I need to preempt (and on which slide), and the three numbers that must be on the traction slide. Be opinionated about structure. If you need more info, ask one question.

WHEN TO USE

Before building a deck, when investor meetings aren't converting, or when your pitch feels flat.

PRO TIP

The slide after your "big idea" slide is where investors decide — make it your strongest proof point.

CHAPTER 2

Content Creation Prompts

12 Prompts

Blog Post Architecture

You are a senior content strategist who has written 500+ viral blog posts. Write a complete blog post about [TOPIC].

Structure requirements:

- Opening hook: Start with a surprising statistic, counterintuitive claim, or scenario that creates a knowledge gap. No "In today's world" or generic introductions.
- Subheadings: Each H2 should work as a standalone tweet—specific, bold, curiosity-triggering
- Body: 1,500 words. Every 200–300 words, include a concrete example, case study, or data point. No theoretical fluff.
- Conclusion: End with ONE specific action the reader can take in the next 10 minutes

Writing rules:

- Use active voice for 85%+ of sentences
- Write at 8th-grade reading level (Flesch-Kincaid)
- Zero filler phrases ("it's important to note", "as we all know", "in conclusion")
- Make bold claims backed by specifics—this is the kind of post people bookmark

Before you write, ask me: What's the reader's biggest misconception about this topic? Then write the post that shatters it.

WHEN TO USE

When you need a publication-ready blog post that actually gets read and shared, not just published.

PRO TIP

Answer the AI's question about misconceptions—that one detail will make the entire post 10x more interesting than generic content.

Newsletter That People Actually Read

You are a newsletter writer with 50,000+ engaged subscribers. Write a newsletter issue about [TOPIC].

Format:

- Subject line: 6 words or less. Create curiosity or surprise, never describe the content directly.
- Opening (2–3 sentences): Start with "You" or a provocative question. No preamble.
- Main content (400–600 words): One core insight explained through a story, example, or case study. No listicles.
- Closing: One sentence that makes the reader think differently + one specific action
- P.S.: Add a counterintuitive observation or unexpected resource related to the topic

Voice:

- Write like you're texting a smart friend
- Use short paragraphs (2–3 sentences max)
- Include at least one "Wait, what?" moment that challenges conventional wisdom
- End sentences with periods, not exclamation marks (you're confident, not desperate)

First, ask me: What do most people get wrong about this topic? Then write the newsletter that corrects it with style.

WHEN TO USE

When you need a newsletter that gets opened, read completely, and forwarded to friends.

PRO TIP

The P.S. is often the most-read part—use it to add a tactical resource or surprising fact that rewards people who read to the end.

Social Caption Batch Creator

You are a social media strategist who has generated 50M+ impressions. Create 10 social media captions about [TOPIC].

Requirements:

- Mix formats: 3 short (under 50 words), 4 medium (50–150 words), 3 long (150–300 words with line breaks)
- Each caption must have a DIFFERENT opening pattern: question, bold claim, personal story, data point, contrarian take, scenario, quote reaction, before/after, misconception, prediction
- Include clear formatting: Use line breaks, emojis strategically (2–3 max per caption), and bullet points for listy content
- Every caption ends with either a question to drive comments OR a clear CTA

Voice:

- Authoritative but conversational—like you've actually done this 100 times
- Zero cringe: No "Let's dive in", "Here's the tea", "Buckle up", or "Mind. Blown."
- Lead with value in the first sentence (people decide to read in 1.5 seconds)

First, tell me: What platform? (LinkedIn/Twitter/Instagram) Then I'll optimize each caption for that algorithm and audience behavior.

WHEN TO USE

When you need two weeks of social content written in 5 minutes instead of grinding for 2 hours.

PRO TIP

Paste these into your scheduling tool as-is, but change 2–3 words in each to match your actual voice before posting.

Video Script Framework

You are a video script writer whose content has generated 100M+ views. Write a video script about **[TOPIC]**.

Structure (for 3–8 minute video):

- HOOK (first 8 seconds): Start with a pattern interrupt—bold claim, shocking stat, visual contrast, or unanswered question. Write the EXACT words to say.
- RETENTION LOOP (seconds 9–15): Promise a specific outcome by the end + tease the "but here's what no one tells you" moment
- MAIN CONTENT (80% of video): Break into 3–5 sections with mini-cliffhangers between each. Use "But here's the problem...", "This is where it gets interesting...", "And this is the part that changed everything..."
- PAYOFF (final 30 seconds): Deliver the promised insight + one action they can take today
- CTA: Tell them exactly what to do next (like, subscribe, comment with X, click link)

Script formatting:

- Write **[VISUAL DIRECTION]** in brackets for every major point
- Mark ****emphasis words**** for delivery
- Include (pause) where needed
- Add {B-ROLL SUGGESTION} for supplementary footage

Before I write, ask me: What platform? (YouTube/TikTok/Instagram Reels) Then I'll adjust pacing and style accordingly.

WHEN TO USE

When you need a video script that keeps viewers watching instead of scrolling away in 3 seconds.

PRO TIP

Read the script out loud before filming—if you stumble over a sentence, rewrite it to match how you actually talk.

Headline Swipe File Generator

You are a direct response copywriter who has written 10,000+ headlines. Generate 25 headline variations for **[TOPIC/OFFER]**.

Formula mix (use all of these patterns):

- Numbered list: "7 **[Thing]** That **[Outcome]**"
- How-to: "How to **[Desired Outcome]** Without **[Common Obstacle]**"
- Question: "What If **[Surprising Scenario]**?"
- Negative angle: "Stop **[Doing X]** Until You **[Know Y]**"
- Timeframe: "The **[Timeframe]** **[Thing]** to **[Outcome]**"
- Contrarian: "**[Common Belief]** Is Wrong. Here's Why."
- Before/After: "From **[Bad State]** to **[Good State]** in **[Timeframe]**"
- Secret/Reveal: "The **[Adjective]** **[Thing]** **[Authority Figure]** Doesn't Want You to Know"
- Mistake: "Are You Making These **[Number]** **[Topic]** Mistakes?"
- Ultimate guide: "The Only **[Topic]** Guide You'll Ever Need"

Rules:

- Keep 80% under 60 characters (social media optimized)
- Use specific numbers, not ranges ("7" not "7-10")
- Include power words: proven, secret, fast, simple, guaranteed, free, new, easy, amazing
- Avoid: "that", "things", "stuff", "tips", "tricks" (be more specific)

First, ask me: Is this for a blog post, product, video, or lead magnet? Then I'll optimize the headline psychology accordingly.

WHEN TO USE

When you're staring at a blank page trying to write ONE good headline—get 25 instead and pick the best.

PRO TIP

Test your top 3 headlines by asking 3 people "Which would you click?"—your favorite is often NOT the winner.

Content Repurposing Machine

You are a content strategist who extracts 10 pieces of content from one source. I'll give you one piece of content, and you'll repurpose it into multiple formats.

Paste your source content below, then I'll create:

1. **Twitter/X thread** (8–12 tweets with hooks and transitions)
2. **LinkedIn post** (200–300 words, professional tone)
3. **Instagram carousel** (8–10 slide outlines with headlines and key points)
4. **Email newsletter** (400–600 words)
5. **YouTube video outline** (intro hook, 3–5 main points, outro CTA)
6. **5 short-form video scripts** (under 60 seconds each, TikTok/Reels style)
7. **Blog post outline** (H2 sections with subpoints)
8. **3 quote graphics** (pull the most powerful statements)
9. **Pinterest pin titles** (5 variations, keyword-optimized)
10. **Podcast talking points** (conversational outline with stories)

My process:

- Extract the core insight
- Adapt the hook for each platform's algorithm and audience behavior
- Reformat structure to match consumption patterns (short-form vs. long-form)
- Keep the unique perspective but change the delivery

Paste your source content now, and tell me: What format is it currently? (blog, video, podcast, etc.)

WHEN TO USE

When you spent 2 hours creating one piece of content and want to get 30+ social posts from it without starting over.

PRO TIP

Repurpose your best-performing content from 6–12 months ago—your audience has likely grown and most people never saw it.

SEO Content Brief Builder

You are an SEO content strategist who has ranked 500+ articles on page one. Create a complete content brief for **[TOPIC/KEYWORD]**.

Brief includes:

1. **Primary keyword**: **[Auto-detected or I'll ask]**
2. **Search intent**: What the searcher actually wants to accomplish
3. **Headline options** (3 variations under 60 characters, keyword in first half)
4. **Meta description** (155 characters, includes keyword + benefit)
5. **Target word count**: **[Based on competitor analysis I'll do]**
6. **Required H2 sections** (6–8 subheadings that match search intent + related searches)
7. **Semantic keywords to include naturally** (15–20 LSI terms)
8. **Questions to answer** (from "People Also Ask")
9. **Content angle**: The unique POV that differentiates this from the 10 other articles on page one
10. **Internal linking opportunities** (suggest 3–5 relevant topics to link to)

What makes this brief work:

- It's not just keyword stuffing—it's answering the actual search intent
- The structure matches what already ranks (but with better execution)
- Built-in differentiation so you're not creating the 11th clone article

First, tell me: Just the topic or keyword. I'll research the search landscape and build the complete brief.

WHEN TO USE

When you want to rank on Google without guessing what to write or how to structure it.

PRO TIP

Write the article in the exact H2 order the brief gives you—that structure is based on what Google already rewards.

Email Copy That Converts

You are a conversion copywriter who has written emails that generate 7 figures in revenue. Write a sales email about **[PRODUCT/OFFER]**.

Email structure:

- ****Subject line****: 6 words or less. Use curiosity, urgency, or direct benefit. Test 3 variations.
- ****Preview text****: 40 characters that extends the subject line's hook
- ****Opening**** (2–3 sentences): Start with "You" or a relatable pain point. No pleasantries.
- ****The problem**** (100–150 words): Agitate the specific pain your offer solves. Make them feel it.
- ****The solution**** (150–200 words): Introduce your offer as the bridge between pain and desired outcome
- ****Social proof**** (50–100 words): One specific customer result, not vague testimonials
- ****The offer**** (50–75 words): What they get, what it costs, why now
- ****CTA**** (one sentence): Tell them exactly what to do. Use first-person ("Yes, I want **[specific benefit]**")
- ****P.S.****: Restate the main benefit or add urgency/scarcity element

Writing rules:

- Use short paragraphs (2–3 sentences max)
- Include one power word per paragraph (proven, guaranteed, fast, simple, exclusive, limited)
- Address objections before they arise
- Zero hype—be confident, not desperate

First, ask me: What's the #1 objection people have before buying? Then I'll write an email that dissolves it.

WHEN TO USE

When you need an email that actually drives sales, not just opens and deletes.

PRO TIP

Send this email at 10 AM on Tuesday or Wednesday—highest open and click-through rates for most audiences.

Landing Page Copy Blueprint

You are a landing page copywriter who converts at 15%+ (top 1% of the industry). Write complete landing page copy for **[PRODUCT/OFFER]**.

Landing page sections:

HERO (above the fold):

- Headline: One sentence. Outcome-focused, not feature-focused. Under 10 words.
- Subheadline: One sentence. Explain how or add credibility. Under 15 words.
- CTA button: 2-4 words, first-person language ("Get My **[Benefit]**")

PROBLEM (section 2):

- 3 pain points written as "You've tried **[common solution]** but **[why it fails]**..."
- Agitate the frustration without being manipulative

SOLUTION (section 3):

- Introduce your offer as the bridge
- 3 key benefits (outcomes, not features)
- One sentence each, starting with the benefit

HOW IT WORKS (section 4):

- 3-step process
- Each step: Number + Action + Result
- Make it sound simple and fast

SOCIAL PROOF (section 5):

- 2-3 specific customer results with numbers
- Format: "**[Name]** got **[specific result]** in **[timeframe]**"

OFFER (section 6):

- What's included (bulleted list, benefit-focused)
- Price + any guarantee
- Urgency element (limited spots, bonus expires, etc.)

FAQ (section 7):

- 5 questions that address the biggest objections
- Keep answers short (2-3 sentences)

FINAL CTA (section 8):

- Restate the main benefit
- Repeat the CTA button
- Add a risk-reversal statement under the button

First, ask me: What's the main result people want from this offer? Then I'll write copy that makes that outcome irresistible.

Storytelling Framework Activator

You are a master storyteller who has written 1,000+ viral stories. Take my [TOPIC/MESSAGE] and turn it into a compelling narrative.

Story structure (choose the best fit):

Option A: The Hero's Journey (Transformation story)

- Ordinary world: Where I/they started
- Call to adventure: The moment everything changed
- Challenges: 3 specific obstacles faced
- Breakthrough: The turning point
- Resolution: Where I/they are now
- Lesson: What this means for the reader

Option B: The Mistake Story (Credibility builder)

- The setup: What I thought would work
- The mistake: What I did wrong (be specific)
- The consequence: What it cost me
- The lesson: What I learned
- The application: How the reader can avoid this

Option C: The Underdog Story (Engagement magnet)

- The disadvantage: What was stacked against me/them
- The determination: Why quitting wasn't an option
- The strategy: The unconventional approach taken
- The victory: The specific win
- The insight: What made the difference

Writing rules:

- Use sensory details (what I saw, heard, felt)
- Include dialogue when possible (even internal dialogue)
- Show vulnerability—the messier parts make it relatable
- End with a universal truth, not a moral lecture
- Keep it under 600 words

Tell me: What's the core message or lesson you want to convey? Then I'll ask 2–3 questions to pull out the story details and write the full narrative.

WHEN TO USE

When you have a point to make but need to wrap it in a story that people actually remember and share.

PRO TIP

The best stories include a specific moment of failure or doubt—that's what makes the success feel real instead of humble-bragging.

Content Calendar Architect

You are a content strategist who plans 90 days of content in 30 minutes. Create a complete content calendar for **[TOPIC/BUSINESS]**.

Calendar deliverables:

1. **30 content ideas** (mix of formats: blog posts, social posts, videos, emails, lead magnets)
2. **Content themes**: Organized into 4–5 pillar topics that repeat monthly
3. **Publishing frequency**: Optimized schedule based on platform and audience
4. **Content mix**: 60% educational, 30% engagement, 10% promotional (adjust if needed)
5. **Repurposing plan**: Show which long-form pieces become multiple short-form assets

Each content idea includes:

- Working title
- Format (blog, video, carousel, thread, etc.)
- Core angle (the unique perspective)
- Primary CTA (what action do you want them to take?)
- Difficulty (easy/medium/hard to create)

Strategic elements:

- Ideas build on each other (not random topics)
- Mix of evergreen and timely content
- Balance between beginner and advanced
- Include content gaps competitors aren't covering

First, tell me: What's your main business goal right now? (grow email list, launch product, build authority, drive sales) Then I'll ask 2–3 clarifying questions and build the full 30-day calendar.

WHEN TO USE

When you're tired of posting randomly and want a strategic content plan that actually builds toward a business goal.

PRO TIP

Batch-create all your "easy" content first—that builds momentum and makes the harder pieces feel less overwhelming.

Authority Article Outliner

You are an investigative journalist who writes the definitive article on complex topics. Create a comprehensive outline for the ultimate guide to [TOPIC].

Article requirements:

- 3,000–5,000 words (this is the ONE article people bookmark and reference for years)
- 15–20 H2 sections minimum
- Each section has 3–5 H3 subpoints
- This should be THE resource—comprehensive but not overwhelming

Outline structure:

I. INTRODUCTION

- Hook: Counterintuitive claim or surprising stat
- Why this matters: The stakes
- What this guide covers: Content preview
- What makes this different: Your unique angle

II–IV. FOUNDATIONAL SECTIONS (3 sections)

- Cover the basics, definitions, common misconceptions
- Include history or context if relevant
- Address why most people get this wrong

V–XII. CORE CONTENT SECTIONS (8 sections)

- The deep expertise—strategies, frameworks, case studies
- Each section includes: concept explanation, real example, common mistakes, implementation steps
- Build from beginner to advanced progressively

XIII. COMPARISON/ALTERNATIVES

- Compare different approaches or tools
- Pros/cons for each
- Recommendations based on scenarios

XIV. IMPLEMENTATION ROADMAP

- Step-by-step action plan
- What to do first, second, third
- Timeline expectations

XV. ADVANCED TACTICS

- Expert-level strategies
- Edge cases and nuances
- What to do once you've mastered the basics

XVI. COMMON PITFALLS

- Mistakes to avoid

- Red flags to watch for
- How to course-correct

XVII. TOOLS & RESOURCES

- Recommended tools (with brief descriptions)
- Further reading
- Communities or experts to follow

XVIII. FUTURE TRENDS

- Where this is heading
- What to prepare for
- Predictions

XIX. CONCLUSION

- Key takeaways (3-5 bullets)
- One next action
- Reminder of why this matters

XX. FAQ

- 10-15 questions addressing every remaining objection or confusion

First, tell me: What's the topic? Then I'll ask 2-3 questions about your expertise level and audience, and deliver the complete outline with H2 and H3 sections ready to write from.

WHEN TO USE

When you want to write THE definitive article that ranks #1, gets linked to constantly, and establishes you as the authority.

PRO TIP

Don't try to write this in one sitting—tackle 2-3 sections per day and you'll finish a comprehensive guide in a week without burnout.

CHAPTER 3

Coding Assistant Prompts

12 Prompts

Rubber Duck Debugger

You are a senior debugging partner who thinks out loud. I'm stuck on something. Walk me through the problem step-by-step like you're debugging it yourself — check my assumptions, spot logic errors, and trace the actual vs expected behavior. Then show me the fix with working code. Don't ask me questions — investigate the code and tell me what you find. **[paste code + error/unexpected behavior]**

WHEN TO USE

When you've been staring at a bug for 20+ minutes and need fresh eyes to spot what you're missing.

PRO TIP

Include any error messages, logs, or "this is what I expected vs what actually happened" context right after your code paste.

Code Review Partner

Review this code like a senior engineer who's mass-approving PRs on a Friday. Flag only what actually matters — bugs, security holes, performance killers, and things that'll break in production. Skip style nitpicks. Show me the fixed code with inline comments explaining what you changed and why. Be direct. **[paste code]**

WHEN TO USE

Before merging anything that touches auth, payments, data handling, or user-facing features.

PRO TIP

If the AI suggests changes you don't understand, reply with "Explain the [specific concern] like I'm competent but not an expert in this area."

Architecture Decision Helper

I'm deciding how to build **[describe feature in 1 sentence]**. Give me 3 concrete approaches with actual code examples (not pseudocode). For each: show the implementation, list the real tradeoffs (performance, maintenance, complexity), and tell me which you'd pick and why. Assume I'm competent but not a system design expert. Ask me about my stack, scale, and constraints only if it genuinely changes your recommendation.

WHEN TO USE

When you're about to start a feature and aren't sure if you should reach for a library, roll your own, or take a completely different approach.

PRO TIP

The AI will ask about your tech stack and scale — answer honestly so it doesn't over-engineer a solution for 10 users or under-engineer for 10,000.

Refactoring Guide

This code works but it's a mess. Refactor it like you're preparing it for a code review with your tech lead. Show me the cleaned-up version with: better naming, extracted functions, reduced duplication, and clearer logic flow. Include before/after comparison and explain the 3 biggest improvements. Keep the same functionality — no feature changes. **[paste code]**

WHEN TO USE

When you hacked something together to make it work and now need to make it maintainable before moving on.

PRO TIP

If the refactored version looks wildly different, ask "What's the risk of breaking something with these changes?" to gauge safety.

API Design Workshop

I need to build an API for **[describe what it does in 1 sentence]**. Design the endpoints with: HTTP methods, URL structure, request/response examples (actual JSON), error handling, and auth approach. Make it RESTful and intuitive — optimize for developer experience. Then give me the implementation starter code for **[your framework/language]**. Ask me about my stack and requirements before designing.

WHEN TO USE

Before writing any API code — designing first prevents the "I have to refactor 8 endpoints now" problem.

PRO TIP

After getting the design, ask "What mistakes do developers commonly make implementing this pattern?" to avoid landmines.

Database Schema Designer

I'm building **[describe feature in 1 sentence]**. Design the database schema with: table definitions, column types, indexes, foreign keys, and relationships. Show me the SQL CREATE statements and explain your indexing decisions. Flag any potential N+1 queries or scale issues. Then ask me about my database (Postgres/MySQL/etc.) and expected data volume to refine the design.

WHEN TO USE

Before running any migrations — bad schema decisions are expensive to fix later.

PRO TIP

Always ask "What happens when I need to add [related feature]?" to test if the schema is flexible enough.

Test Suite Architect

Write a comprehensive test suite for this code. Give me: unit tests for core logic, integration tests for critical paths, edge cases I probably missed, and mocks for external dependencies. Use **[testing framework]** and show actual runnable test code with clear assertions. Prioritize tests that catch bugs in production, not tests that just hit 100% coverage. **[paste code]**

WHEN TO USE

When you know you should write tests but aren't sure what scenarios actually matter or how to structure them.

PRO TIP

Add "Focus on tests that would have caught bugs I've actually shipped before" if you're aware of your blind spots.

Documentation Generator

Write developer documentation for this code as if you're onboarding a new teammate who's competent but unfamiliar with this codebase. Include: what it does, why it exists, how to use it (with examples), gotchas, and what to watch out for when modifying it. Write for developers, not end users. Be concise and skip obvious stuff. **[paste code]**

WHEN TO USE

When you're finishing a complex feature and need docs before you forget how it works.

PRO TIP

If you're documenting an API or library, add "Include a quick-start example that covers the most common use case."

Performance Optimization Advisor

Audit this code for performance issues. Find: unnecessary loops, N+1 queries, missing indexes, redundant calculations, memory leaks, and blocking operations. Show me the optimized version with benchmarks or explanations of expected improvements. Only suggest changes that materially improve performance — skip micro-optimizations that don't matter. **[paste code]**

WHEN TO USE

When something feels slow, when you're about to hit scale, or before launching a performance-critical feature.

PRO TIP

Include context like "This runs 10,000 times per request" or "This processes 50MB files" so the AI prioritizes the right optimizations.

Security Audit Checklist

Audit this code for security vulnerabilities like you're doing a pre-launch security review. Check for: SQL injection, XSS, CSRF, authentication bypasses, authorization holes, exposed secrets, insecure dependencies, and data leaks. Flag everything suspicious with severity (critical/high/medium) and show me the secure version. Be paranoid. **[paste code]**

WHEN TO USE

Before shipping anything that touches user data, auth, payments, or external APIs.

PRO TIP

If the AI finds something, ask "Show me an exploit example" to understand the actual risk — sometimes "vulnerabilities" are theoretical.

Git Commit Message Crafter

Write a git commit message for these changes. Use conventional commits format (feat/fix/refactor/etc). Start with a clear, specific subject line (50 chars max), then a body that explains what changed and why (not how — the diff shows how). Make it useful for someone reviewing git history 6 months from now. **[paste git diff or describe changes]**

WHEN TO USE

When you've made complex changes and "updated stuff" isn't going to cut it.

PRO TIP

If you have multiple unrelated changes, ask "Should I split this into multiple commits?" to keep history clean.

Codebase Onboarding Guide

I'm new to this codebase. Generate an onboarding guide that explains: what this project does, how the code is organized (folder structure + what lives where), key files and their purposes, where to start reading, common patterns used, and gotchas. Write it for a developer who can read code but doesn't know this project. Be specific — link to actual files and functions. **[paste repo structure or key files]**

WHEN TO USE

When joining a new project, or when your own project has grown complex enough that you forget how it's organized.

PRO TIP

After getting the overview, ask "What's the flow for [specific feature]?" to trace through a real user action end-to-end.

CHAPTER 4

Productivity Prompts

12 Prompts

Daily Battle Plan

You are my strategic operations officer. Here's everything competing for my attention today:

[Paste your to-do list, calendar items, messages you need to handle — dump it all]

Give me:

1. ****The ONE thing**** — What I must finish today no matter what happens
2. ****The brutal cut**** — 3 things to delete, delegate, or defer with zero guilt
3. ****Time-blocked schedule**** — Hour-by-hour plan from now until end of day
4. ****Failure protocol**** — If I only get 4 hours of work done, which 4 hours?

Be ruthlessly specific. Use actual times (not "morning"). If you need to know my energy peaks or constraints, ask me one follow-up question.

WHEN TO USE

Every morning or when you feel overwhelmed by competing priorities.

PRO TIP

Paste this prompt result into a note you keep visible all day — checking it prevents decision fatigue and reactive mode.

Goal Setting That Sticks

Act as a behavioral design expert who specializes in making goals actually happen.

Here's what I want to achieve: **[Describe your goal in one sentence]**

Design a goal structure that includes:

1. **Minimum viable version** — The smallest win I can hit in 7 days that proves progress
2. **The daily proof** — One specific action I do every day (15 minutes max) that compounds
3. **The forcing function** — External accountability mechanism with real consequences
4. **Failure tells** — 3 early warning signs I'm drifting off track
5. **The restart protocol** — Exactly what I do when I miss 2+ days

No motivational fluff. Just tactical clarity.

WHEN TO USE

When setting quarterly goals, New Year intentions, or any target that matters enough to design properly.

PRO TIP

Screenshot the forcing function and failure tells — those two sections prevent 90% of goal abandonment.

Decision Clarity Engine

You are a decision strategist who cuts through analysis paralysis.

Here's the decision I'm stuck on:

[Describe the choice you're facing — include what you're weighing between]

Analyze this using:

1. ****10/10/10 lens**** — How will I feel about this in 10 days, 10 months, 10 years?
2. ****Regret minimization**** — Which choice will I regret less at age 80?
3. ****Hell yes or no**** — Does either option make me feel "hell yes"? If not, why?
4. ****Second-order effects**** — What doors does each choice open or close?
5. ****The call**** — Tell me which to choose and the exact first step to take tomorrow morning.

Be opinionated. I need a clear recommendation, not balanced pros/cons.

WHEN TO USE

When you've been circling a decision for more than 3 days without pulling the trigger.

PRO TIP

The 10/10/10 lens alone solves 70% of decisions — use just that section if you're short on time.

Eisenhower Priority Matrix

You are a time management strategist. Here's what's on my plate:

[Paste your tasks, projects, requests — everything you're juggling]

Sort these into the Eisenhower Matrix and give me:

1. ****DO NOW**** (urgent + important) — With time estimates
2. ****SCHEDULE**** (important, not urgent) — Specific calendar blocks to assign them
3. ****DELEGATE**** (urgent, not important) — Who should handle each + handoff message template
4. ****DELETE**** (neither urgent nor important) — Permission to drop these entirely

Be honest about what's fake-urgent. If something feels urgent but isn't important, call it out.

WHEN TO USE

Weekly planning sessions or when you feel busy but not productive.

PRO TIP

The DELETE section is the most valuable — read it first and feel the weight lift before organizing what remains.

Meeting Agenda That Respects Time

You are an executive meeting designer. I need an agenda for this meeting:

Purpose: **[One sentence — what outcome you need]**

Attendees: **[Who's joining]**

Length: **[How long you have]**

Build me an agenda with:

1. ****Pre-meeting homework**** — What attendees review beforehand (5 min max)
2. ****Time-boxed sections**** — Minute-by-minute blocks with what we're deciding or creating
3. ****Decision framework**** — How we'll actually choose/agree (vote, consensus, single decider)
4. ****Output format**** — Exactly what artifact we produce (doc, decision, action list)
5. ****Success statement**** — One sentence I can say at the end to confirm we hit the goal

No "discuss" or "brainstorm" — only sections that produce something concrete.

WHEN TO USE Before scheduling any meeting longer than 15 minutes.

PRO TIP Send the pre-meeting homework and decision framework to attendees 24 hours early — cuts meeting time by 40%.

Weekly Review System

You are my executive coach running our weekly review session. Here's my data:

[Paste: completed tasks, meetings attended, wins, fires you fought, what felt hard]

Run the review:

1. **Pattern recognition** — What 2-3 patterns do you see in how I spent my time?
2. **Energy audit** — Which activities drained me? Which energized me?
3. **The silent killer** — What important-not-urgent thing did I avoid all week?
4. **Next week's edge** — One specific improvement to how I work (not what I work on)
5. **Win tracking** — Frame my biggest accomplishment in a way that feels significant

Be direct about where I'm drifting off course. I need coaching, not cheerleading.

WHEN TO USE

Every Friday afternoon or Sunday evening to close the loop on the week.

PRO TIP

Run this 4 weeks in a row and the pattern recognition section will reveal your actual work style vs. your imagined one.

Time Audit Analyzer

You are a time efficiency analyst. Here's how I actually spent my time recently:

[Paste: calendar from last week, rough time log, or just describe a typical day in detail]

Analyze and report:

1. **The expensive hours** — Time spent on low-value work that cost me high-value opportunities
2. **Hidden time tax** — Recurring small tasks that add up (emails, context switching, etc.)
3. **Batching opportunities** — Which tasks I should group together to save 5+ hours/week
4. **The \$1000/hour question** — If I could only work 4 hours this week, which 4 hours create the most value?
5. **Deletion candidates** — 3 things I do regularly that I should stop doing entirely

Give me dollar values where possible (if I bill at \$X/hour, this wastes \$Y/week).

WHEN TO USE

Quarterly, or whenever you feel busy but your revenue/results aren't growing.

PRO TIP

The hidden time tax section reveals death by a thousand cuts — delegate or automate those first.

Habit Design Lab

Act as a habit formation specialist. I want to build this habit:

[Describe the habit you want — be specific about frequency and what "doing it" looks like]

Design the system:

1. ****Minimum viable habit**** — The smallest version I can do even on terrible days (2 min max)
2. ****Trigger design**** — Specific existing behavior I anchor this to (not "every morning")
3. ****Friction removal**** — 3 obstacles to remove before I start (prep, environment, etc.)
4. ****Tracking mechanism**** — Dead simple way to track without an app (visual, physical)
5. ****The 2-day rule**** — Never skip twice. If I miss one day, what's the forcing function for day 2?

Assume I have zero discipline. Design for laziness.

WHEN TO USE

When starting any new habit you want to maintain for 90+ days.

PRO TIP

The trigger design is everything — "after I pour coffee" beats "in the morning" 10 out of 10 times.

Project Breakdown Engine

You are a project architect who turns vague ideas into executable plans. Here's my project:

[Describe what you're trying to build/ship/complete]

Break it down:

1. **Minimum shippable version** — What's the smallest thing I can finish in 2 weeks that works?
2. **Sequential phases** — 4-5 phases from MVP to full vision (each deliverable/testable)
3. **First 3 moves** — Extremely specific next actions I can start today (30 min each)
4. **Stall points** — Where will I probably get stuck? What's the plan for each stall?
5. **Done looks like** — Concrete description of what "finished" means for each phase

No theory. Only moves I can execute.

WHEN TO USE

At the start of any project larger than a day's work.

PRO TIP

Start phase 2 planning only after shipping phase 1 — premature planning kills momentum.

Delegation Framework

You are a delegation strategist. Here's what's overwhelming me:

[List tasks, responsibilities, recurring work that's on your plate]

Help me delegate:

1. ****Delegation candidates**** — Which 5 items should I delegate first (ranked by ROI)
2. ****Role definition**** — For the top 3, define the role: title, responsibilities, success metrics
3. ****Handoff package**** — What documentation/training each needs (keep it minimal)
4. ****Trust protocol**** — How I check quality without micromanaging (frequency, format)
5. ****Failure recovery**** — If they drop the ball, what's my 15-minute fix?

Assume I'm scared to let go. Convince me why each delegation is safe.

WHEN TO USE

When you're working 50+ hour weeks but revenue isn't growing proportionally.

PRO TIP

Delegate the \$25/hour tasks first (even if you do them well) — frees time for \$500/hour work.

Energy Management Optimizer

You are an energy optimization consultant. Here's my reality:

[Describe: your energy peaks/crashes, what drains you, what energizes you, current sleep/exercise/diet baseline]

Optimize my energy:

1. ****Energy map**** — Ideal schedule that matches high-energy work to high-energy hours
2. ****Protection blocks**** — Which meetings/tasks to ban during peak hours (be specific)
3. ****Recovery rituals**** — 3 micro-resets I can do in 5 minutes when energy crashes
4. ****The Sunday reset**** — Weekend routine that sets me up for a strong Monday
5. ****Energy ROI**** — One lifestyle change that gives me 20% more useful hours per week

Be specific about timing (not "morning" but "8:30–11:00 AM").

WHEN TO USE

When you have time available but feel too drained to use it effectively.

PRO TIP

The protection blocks have 10x ROI — defend your peak 3 hours like your business depends on it (it does).

Focus Session Designer

You are a deep work architect. I need to make serious progress on:

[Describe the work that requires deep focus]

Design my focus session:

1. **Session length** — Optimal block based on this work type (don't assume 2 hours)
2. **Pre-session ritual** — 5-minute routine that gets me into state (specific actions)
3. **Environment design** — What to close, block, silence, and what to have visible
4. **Progress milestones** — Checkpoints every 25–30 min so I know I'm on track
5. **Exit protocol** — How to end the session and capture momentum for next time

Assume I'll be tempted to check messages. Design against my weaknesses.

WHEN TO USE

Before any work session where interruption would cost you hours of recovery time.

PRO TIP

The exit protocol is underrated — spend 2 minutes writing "next step" so you don't lose 20 minutes reorienting tomorrow.

CHAPTER 5

Social Media Prompts

12 Prompts

TikTok Script Machine

You are a TikTok script writer who understands that people scroll past 90% of videos in 1.5 seconds.

Write me a 60-second TikTok script about: **[TOPIC]**

MANDATORY STRUCTURE:

- ****Hook (0-2 sec)****: Pattern interrupt. Not a question. Not "Have you ever..." Start mid-action, mid-conflict, or with something visually shocking.
- ****Body (3-45 sec)****: Fast cuts. One idea per 3-second segment. **[VISUAL CUE]** markers for when to show something, cut, or switch angles.
- ****Payoff (46-55 sec)****: Deliver the value. No fluff.
- ****CTA (56-60 sec)****: What to do next. Make it specific, not "follow for more."

Write it the way people actually TALK in videos, not the way people write. Use sentence fragments.

Interruptions. Emphasis on random words. That's how humans speak on camera.

Give me 3 hook variations to test — I'll pick the strongest one.

WHEN TO USE

When you need a scroll-stopping TikTok script that sounds natural on camera, not stiff and scripted.

PRO TIP

Record all 3 hooks and test them as separate videos — hooks make or break performance, not the content after.

Twitter/X Thread Builder

You are a Twitter thread architect who knows that threads live or die by the first tweet.

Build me a thread about: **[TOPIC]**

RULES:

1. ****Tweet 1**** must work as a standalone banger — 90% of people won't click "Show more." Make it provocative, specific, or contrarian. No setup tweets.
2. ****Tweets 2-8**** deliver on the promise. One clear idea per tweet. No filler. If you're saying "It's important to note" you're wasting characters.
3. ****Final tweet**** = action step, not "If you liked this, follow me." Tell me what to do with this information.
4. Each tweet must be under 280 characters but feel complete — no cliffhanger gimmicks.

Show me the thread with tweet numbers and character counts. Then give me 2 alternative options for tweet 1 in case the first one doesn't hit.

WHEN TO USE

When you need a high-performing thread that doesn't rely on engagement bait to get reads.

PRO TIP

Post tweet 1 solo first and gauge response for 10 minutes — if it flops, try an alternate hook before threading.

Instagram Carousel Creator

You are an Instagram carousel designer who understands that slide 1 is an ad for slide 2.

Create a carousel about: **[TOPIC]**

SLIDE STRUCTURE (design it for me):

- **Slide 1**: Bold claim or question + "Swipe to see why →" (but phrase it better than that)
- **Slides 2-7**: One insight per slide. Hierarchy: Big idea at top, explanation below, visual suggestion in **[BRACKETS]**.
- **Slide 8**: Summary or action step + CTA

For each slide, write:

1. **Headline** (the big text people see while scrolling)
2. **Body copy** (supporting text, 1-2 lines max)
3. **[VISUAL SUGGESTION]** (what image, icon, or design element supports this slide)

Also write the caption: start with a hook (not "In this carousel..."), add value in 3-5 lines, end with a question to drive comments.

WHEN TO USE

When you need a swipe-worthy carousel that actually teaches something instead of restating the obvious.

PRO TIP

Slide 1 performance predicts everything — if people don't swipe, the rest doesn't matter. Test different slide 1 headlines.

LinkedIn Thought Leadership Post

You are a LinkedIn ghostwriter for executives who don't want to sound like robots.

Write me a LinkedIn post about: **[TOPIC]**

STRUCTURE:

1. ****Opening line****: Personal story, contrarian observation, or bold claim. Not "I've been thinking about..." — start with impact.
2. ****Body (3–5 short paragraphs)****: Share the lesson, framework, or insight. Use line breaks liberally. One idea per paragraph. No buzzword salad.
3. ****Closing****: Takeaway + conversation starter (ask something specific, not "What do you think?").

TONE: Professional but human. Like you're talking to a smart colleague over coffee, not presenting at a board meeting. Use "I" and "you." Share what you actually learned, not what sounds impressive.

NO: "Thrilled to announce," "I'm humbled," "Lessons learned," "Game changer," "Excited to share."

Format with short paragraphs and line breaks — LinkedIn rewards readability.

WHEN TO USE

When you want to build authority without sounding like a corporate press release or motivation poster.

PRO TIP

The posts that perform best on LinkedIn tell a story about failure, change, or an unconventional approach — not your wins.

Engagement Hook Library

You are a hook specialist who knows that 90% of content fails because the first sentence is boring.

Generate 20 high-performing hooks for content about: **[NICHE/TOPIC]**

Give me 4 of each type:

1. **Pattern Interrupt**: Something unexpected or contrarian that stops the scroll
2. **Personal Story Lead**: "I once..." or "Last week I..." that hints at a lesson
3. **Bold Claim**: A strong, specific statement that demands proof
4. **Question Hook**: Not yes/no questions — questions that make people think "Wait, why IS that?"
5. **List Tease**: "3 things," "The only 5," etc. — but make the framing unique

For each hook, mark it: **[TikTok]**, **[Twitter]**, **[LinkedIn]**, **[Instagram]** depending on where it works best.

NO GENERIC HOOKS. Every hook should feel like it was written for MY niche specifically, not a template anyone could use.

WHEN TO USE

When you're stuck staring at a blank screen or your recent posts are getting ignored in the first 3 seconds.

PRO TIP

Save the best-performing hooks in a swipe file — great hooks can be remixed dozens of times with different content behind them.

Content Calendar System

You are a content strategist building a 30-day posting plan that won't burn me out.

My niche: **[NICHE]**

Build me a calendar with:

- 4 content pillars (themes I'll rotate through)
- Posting frequency: **[DAILY / 3X WEEK / 5X WEEK]**
- Primary platform: **[PLATFORM]**

For each day, give me:

1. ****Pillar**** (which theme)
2. ****Format**** (thread, carousel, video, single post)
3. ****Topic**** (specific, not vague — "How to price your first client" not "Pricing tips")
4. ****Hook starter**** (first line to get me unstuck)

RULES:

- No back-to-back similar formats (don't post 5 carousels in a row)
- Mix educational, personal, and conversational content
- Build in 2-3 "easy days" per week (repost a banger, share a hot take, ask a question — low-effort, high-engagement)
- One "test" post per week (try a new format or edgy topic to see what happens)

WHEN TO USE

When you're posting randomly and want a strategic plan that's actually sustainable, not a burnout machine.

PRO TIP

Batch-create content for one pillar at a time (record 4 videos in one session) rather than switching contexts daily.

Audience Deep Analysis

You are an audience research expert who helps creators stop guessing and start knowing their people.

My niche: **[NICHE]**

Analyze my target audience and give me:

1. ****The Real Problem**** — Not what they say they want (e.g., "more followers") but what they actually need (e.g., "validation that their work matters")
2. ****Language Audit**** — 10 phrases, questions, or complaints my audience uses in comments, DMs, or forums. Exact wording, not paraphrased.
3. ****Content Gaps**** — 5 questions they're asking that nobody is answering well (or at all)
4. ****Emotional Triggers**** — What they're afraid of, excited about, frustrated by, and aspiring toward
5. ****Scroll-Stopping Topics**** — 8 content ideas that will make them stop and think "Wait, this is for ME"

Give me insights I can't find in a demographics chart. I need to understand how they think, not just who they are.

WHEN TO USE

When your content is getting ignored and you suspect you're talking to the wrong pain points or using the wrong language.

PRO TIP

Run this quarterly and compare results — your audience evolves, and your messaging should evolve with it.

Viral Content Deconstructor

You are a content analyst who reverse-engineers why something blew up so I can apply the lessons without copying it.

Analyze this viral post/video: **[PASTE URL OR DESCRIBE IT]**

Break down:

1. ****Hook Mechanics**** — What specifically made people stop scrolling in the first 2 seconds? (Visuals, words, pattern interrupt?)
2. ****Emotional Arc**** — What emotion did it trigger and when? (Curiosity, anger, validation, surprise?)
3. ****Story Structure**** — Setup, conflict, resolution. Even if it's 15 seconds, there's a structure.
4. ****Shareability Factor**** — Why would someone send this to a friend? What's the "you HAVE to see this" element?
5. ****Applicability**** — How can I use this formula in MY niche without being a copycat?

Then give me 3 remix ideas: ways to apply this viral framework to my content with a unique angle.

Be specific. Not "it had a good hook" — tell me exactly what words, visuals, or techniques made the hook work.

WHEN TO USE

When you see something blow up in your niche (or adjacent niches) and want to learn from it instead of just envying it.

PRO TIP

Study viral content outside your niche too — the best hooks and structures often come from unexpected places.

Comment & DM Response Templates

You are a community manager who knows that replies are content too — and bad replies kill engagement.

My niche: **[NICHE]**

Create response templates for:

1. ****Positive comments**** (3 variations — don't just say "Thanks!")
2. ****Questions I get all the time**** (5 common questions + responses that give value but tease deeper content)
3. ****Haters/Skeptics**** (3 responses that disarm without being defensive or petty)
4. ****DMs asking for free advice**** (2 templates: one for quick wins, one for redirecting to paid/content)
5. ****Collaboration requests**** (2 templates: interested + not interested, both professional)

RULES:

- Every response should sound like me, not a chatbot
- Add value even in short replies (don't just acknowledge — teach or entertain)
- No "Great question!" or "Thanks for sharing!" — those are filler
- When redirecting to content/product, make it helpful, not salesy

Give me copy-paste templates that I can personalize in 5 seconds.

WHEN TO USE

When you're spending too much time on replies or your responses are bland and forgettable.

PRO TIP

Pin your best replies — a killer response in the comments can become your next post idea or convert lurkers into followers.

Brand Voice Blueprint

You are a brand voice architect. Help me define how I sound so I stop second-guessing every post.

My niche: **[NICHE]**

I want my content to feel: **[PICK 2-3: funny, authoritative, rebellious, warm, no-BS, nerdy, cinematic, raw, polished, irreverent, educational]**

Build me a voice guide with:

1. ****Voice Principles**** (3 rules I follow in every post — e.g., "Always challenge the default advice")
2. ****Word Bank**** — 15 words/phrases I USE and 15 words/phrases I AVOID
3. ****Sentence Structures**** — Show me 5 example sentences that capture my tone
4. ****Content Personality**** — If my brand was a person at a party, who are they and how do they talk?
5. ****Edge vs. Safety**** — Where's my line? What's too far, and what's fair game?

Then rewrite this sample post in MY voice: **[PASTE A GENERIC POST FROM YOUR NICHE]**

I should read the rewrite and think "YES, that's exactly how I'd say it."

WHEN TO USE

When your content feels inconsistent, you're copying other people's styles, or you don't have a clear "sound" yet.

PRO TIP

Reference this document before every content batch — voice drift is real, especially when you're inspired by someone else's content.

Platform Growth Playbook

You are a platform growth strategist who builds actionable 90-day plans, not motivational fluff.

Platform: [TIKTOK / INSTAGRAM / TWITTER / LINKEDIN]

Current followers: [NUMBER]

Goal: [SPECIFIC GOAL — e.g., "500 followers," "5 clients," "1000 email subs"]

Build me a growth playbook with:

1. **Core Strategy** — What's the ONE thing I should prioritize? (Algorithm hack, content format, engagement tactic, collaboration strategy?)
2. **Daily Actions** (15 min/day max) — Exactly what I do every day to grow. Be specific: "Comment on 5 posts in [niche] using [this framework]."
3. **Weekly Experiments** — 3 things to test each week (new format, posting time, content angle, engagement strategy)
4. **Growth Triggers** — 5 specific tactics proven to spike growth on this platform right now (not 3 years ago)
5. **Avoid These Traps** — 3 common mistakes that kill growth on this platform

Give me a 90-day roadmap: Weeks 1-4 (focus), Weeks 5-8 (expand), Weeks 9-12 (optimize). Make it actionable, not theoretical.

WHEN TO USE

When you're stuck at a follower plateau, starting from scratch, or don't have a clear growth strategy beyond "post more."

PRO TIP

Track one metric obsessively each month (engagement rate, profile visits, saves) — vanity metrics lie, behavior metrics don't.

Content Repurposing Multiplier

You are a content repurposing expert who turns one piece of content into 10 without it feeling repetitive.

Original content: **[PASTE YOUR POST, THREAD, VIDEO SCRIPT, OR ARTICLE]**

Transform this into:

1. **Twitter thread** (6–8 tweets, new hook)
2. **Instagram carousel** (5 slides, visual-first approach)
3. **LinkedIn post** (personal story angle)
4. **TikTok script** (60 seconds, pattern-interrupt hook)
5. **Email newsletter section** (conversational, deeper dive)
6. **Quote graphic text** (pull 1 punchy sentence that works standalone)
7. **Engagement post** (turn the idea into a question or poll)
8. **Short-form video concept** (15-sec version for Reels/Shorts)
9. **Long-form video outline** (YouTube structure: hook, value, CTA)
10. **Follow-up content idea** (what's the next logical post on this topic?)

Each format should feel native to the platform — not like a lazy copy-paste. Change the hook, angle, or framing so it's fresh.

WHEN TO USE

When you create a banger and want to squeeze every drop of value from it across platforms without sounding redundant.

PRO TIP

Repurpose your winners, not your flops — if it worked once, it'll work again in a different format or on a different platform.

Start Prompting Like a Pro

These prompts are your starting point, not your ceiling.
Customize them. Combine them. Make them yours.

THE AI PROMPT VAULT
